
Title: Spirituality

Author: Tiernan Caedmon

A great many people
today hold Lord
British's virtues dear
and follow them to the
best of their abilities.
However, even those
most pure of heart and
mind find it a great
task to hold
themselves to these
lofty ideals.

Many who try but
fail to live in the path
of virtue do so because
they forget the nature
of the virtues. Rather
than following the
virtues, one should
follow those
principles from
which they are
derived: Truth, Love,
and Courage.

The three principles
combined form the
virtue of Spirituality.
This virtue has been
defined by our Lord
British as
introspectiveness,
seeking to improve
one's inner being, and
enlightening the lives
of others. Are these
not the fundamental
purposes of virtue?

As I have said, the
path to virtue lies not
in the virtues, but
those principles of
which they are
comprised. I humbly
submit that
Spirituality is the
summation of the
principles. Not
only that, it is my

belief that all
other virtues are
merely incomplete
components of virtue.
